

CINTURATO™ P7

Balanced Performance

High Performance

Ultra High Performance

Cinturato™ P7, the Green revolution meets Performance heritage.

Cinturato™ P7 is the result of the "Green Performance" philosophy, a new approach in developing our products offering the perfect synergy in terms of:

- Performance

- Safety

- Driving pleasure

- Attention to the environment The four Ecoimpact icons on the sidewall of the Cinturato™ P7 highlight its environmental compatibility.

ENERGY™ EFFICIENT: low rolling resistance for reduced fuel consumption with consequent savings for the consumer and a reduction in CO2 emissions.

CLEAN AIR: new tread compounds with no high aromatic oils avoid the dispersion of substances potentially hazardous for the environment through tyre wear.

HIGH MILEAGE: the higher mileage achievable brings direct savings to the consumer. Making a tyre last longer also means producing fewer tyres with numerous benefits in terms of raw material, water and energy savings, lower pollutant emissions and reduced impact of disposal.

LOW NOISE: the optimization of the tread design allows Cinturato™ P7 to decrease the noise emission generated by the tyre spin. For a relaxed and comfortable driving experience. Tread pattern

- Asymmetrical tread pattern with four continuous circumferential channels for efficient expulsion of water from the contact patch.

- Technologically advanced polymers in the compound to increase grip of the tyre on all surfaces for maximum braking performance on wet and dry roads.

- Robust external shoulder to optimize lateral grip on wet and dry roads.

- Innovative tread pattern design for a regular tyre wear: improved ride comfort, excellent safety levels throughout the life of the tyre, high mileage and reduced ride noise. Section: 205 to 245

Rims: 16" to 18"

Technical series: 40 to 60

Speed symbol: H, V, W, Y KEY FITMENTS:
Alfa Romeo, Audi, BMW, Mercedes, Volvo.

SIZE RANGE

RANGE DESCRIPTION	
40	
255/40R18 95W	RUNFLAT
